

## Case Study

Project/customer name:	Changzhou Honda Factory
Year of application:	2019
Location/country:	Changzhou/China
Building type:	Industrial Building
Authorized contractor:	Shandong Sida
Additional project details:	Waterproofing for gutter

General view:

## Challenge:

- The gutter was full of water all the time and the existing waterproofing could not withstand ponding water.
- Therefore, leaking occurred on many spots.
- In addition, some of the spots had complex structure.

## Solution:

- Triflex ProDetail is resistant to alkali und hydrolysis and will not break down in ponding water.
- Triflex ProDetail was also the perfect solution, because it is applied as liquid and therefore fits easily to any complex details.

## Products used at a glance:

Triflex offers liquid PMMA\* based resins (e.g. ProDetail for details or ProTect for areas):

1. Substrate
2. Primer, if necessary
3. Waterproofing layers
  - a) Triflex ProDetail (2kg / sqm)
  - b) Triflex Special Fleece
  - c) Triflex ProDetail (1 kg / sqm)
4. Finish, if wanted

\* Polymethyl methacrylate

**Continually improved over 40 years in order to become the market leader in Europe.**

## Main benefits (European Guideline ETAG 005):

- 25 years estimated working life performance
- Fast curing time and rainproof after only 30 minutes
- Application possible till humidity of 99% and withstands surface temperature after application up to 90° C
- A liquid seamless solution that fits to any structure with complex geometry
- Adherence to any surfaces (Aluminum, steel, plastic, glass, bitumen, concrete, ...)
- Solvent free, environmental friendly and with no risk to health
- High resistance to chemicals, roots and rhizome, alkali and hydrolysis
- Cold application with no flame and flame retardant
- Highly UV resistant (1000 MJ/m<sup>2</sup> = 325 days)
- Easy to impose loads after application (for particular demands as green roofs)
